2022 Buck Pole Weather: Just above freezing during the day, below 32 at night. Fresh snow - sometimes a little on the heavy side, at times mixed with freezing rain. Enough snow for tracking. Didn't seem like much wind. At times, super cold - other times a little more mild. Overall, satisfactory weather conditions and favorable for hunters.

**** Instead of the large tent, this year we wrapped the pavilion with sides – what a big improvement. It allowed more parking space, and a greater area for photo displays, concessions and raffle drawing
